FIT

The leg is more form-fitting, reducing the width of the knee and cuff and limiting the length to obtain a more shapely look. Excellent freedom of movement is still guaranteed thanks to the shape of the crotch and knee.

This is the standard Kapriol fit, suited for every type of use. The shaped crotch prevents trousers from lowering when bending and the looser fit on the leg promotes maximum freedom.

Higher volume is provided in the hips, thighs, knee and ankle to obtain a straighter leg, suited for work that requires maximum movement. The improved ventilation, make them ideal for summer.
